

# HEADLINERS

FORMERLY KNOWN AS CHI

## Guess Who?

See if you can tell who out of these people is HIV positive...

Click on the film below to spot the difference.

## Comments

The same

Very interesting. However the people all look the same. I thought it was the same person. Couldn't they have chosen some people who didn't look so similar, and not have covered up their faces?

Danny Matthewman from London, 20 July 2007 20:54

creativity

I like the idea behind this video. its kinda got me thinking more about hiv i think it works really well in propting that idea that u cant tell who has it.
